Get Comfortable, Sleep Correct

1. Neck support

When it comes to where we rest our heads, we all like different types of pillows. SnüzCurve is designed so that you can still use the pillow you love ensuring a familiar, comfortable sleep.

2. Upper Core cushion

The top of your SnüzCurve is designed with your back and shoulders in mind. It reduces shoulder movement, minimising pressure on your bump, and reducing back pain.

3. Hip support

We're looking after your hip joints and pelvic muscles by keeping your legs separated to the correct gap, in a comfortable way.

4. KneeBlade™

Our KneeBlade™ guides the front of your knees against its cushioning, setting your legs at the perfect angle to improve your sleep posture and reduce stress on your muscles.

5. Ankle support

SnüzCurve looks after your ankles by making sure there's a healthy gap along the whole of your leg. This also takes away any stress on your knees, and makes sure the knee bends in the right position.

A Healthy Sleep Routine

Consistent routine

It's essential to prioritise your sleep. A simple way to keep on top of your routine is by making sure you go to bed and wake up at the same time every day.

Winding down

You can't fall asleep whilst you're stimulating your brain. Before going to bed, give yourself time to settle down by avoiding using your phone and watching TV.

Keeping cool

Are you tired of sleepless nights? By having a fresh airflow with open windows, maintaining a room temperature of no more than 16°C, whilst using a light tog duvet, you can wave goodbye to interrupted sleep.

The right pillow

Selecting the correct pillow is key to alignment. When investing in a pillow, it should hold your head in the correct alignment – in the same posture to your shoulders and spine as if you were standing upright.

Food intake

An imbalance in blood sugar levels can impact your quality of sleep. A simple way to reduce this is to be aware of excessive carbohydrate intake. However, if you're experiencing common heartburn, you can consciously avoid rich, spicy or oily, fried foods.
